INSURANCE DASHBOARD

Business Impact & Strategic Insights

An end-to-end analysis of cross sell, new business & renewal performance
using Excel · Power Pivot · Tableau · Power BI · MySQL

49

Total Opportunities

44

Open Opportunities

150%

Renewal Placed %

PROJECT OVERVIEW

What We Did

1

Data Cleaning in Excel

Cleaned raw insurance data, fixed formats, removed errors.

2

Data Modeling

Connected 1 fact table with dimension tables to build relationships.

3

Power Pivot Dashboards

Summarized large datasets and built interactive Excel dashboards.

4

BI Visualization

Built dashboards in Tableau and Power BI for visual storytelling.

5

SQL KPI Queries

Wrote MySQL queries to calculate and verify all key metrics.

Key Numbers at a Glance

49

Total Opportunities

44

Open Opportunities

150.11%

Renewal Placed Achievement

4.21%

New Invoice Achievement

59.08%

Cross Sell Placed

WHERE WE ARE EXCELLING

1

Renewal Engine is Firing —

Renewal Placed Achievement hit 150.11% — well above target, showing strong client retention.

2

Abhinav Shivam Leads Meetings —

Top account executive with 7 meetings — most active, driving the most client engagement.

3

Employee Benefits is Top Product —

15 units in the opportunity mix — our highest-demand product and biggest revenue driver.

4

Top 4 Opportunities are High Value —

Fire (500K), DB-Mega Policy, EL-Group Medclaim & CVP GMC together show strong pipeline potential.

WHERE WE NEED IMPROVEMENT

1

New Business is Struggling —

New Placed at 17.37% and New Invoice at 4.21% — barely closing new clients, needs urgent attention.

2

Cross Sell Invoice Gap is Huge —

Cross Sell placed at 59.08% but invoiced only 15.14% — deals are placed but not converting to revenue.

3

Meeting Activity Dropped in 2019 —

2020 had 31 meetings vs only 3 in 2019 — a serious engagement gap that must be understood and prevented.

4

Pipeline Stuck at Early Stage —

42 of 49 opportunities are still at 'Qualify' — most deals are not moving forward fast enough.

BUSINESS IMPACT THROUGH THE DATA

1

Renewal at 150.11% —

Exceeds target — our strongest KPI shows the retention team is performing exceptionally well.

2

49 Opportunities Tracked —

44 are still open — a large active pipeline that needs better conversion and follow-through.

3

New Invoice at 4.21% —

Critical gap — new business is generating placements but almost none are turning into invoiced revenue.

4

Cross Sell Invoice 15.14% —

Money is being left on the table — placement and invoicing are disconnected in the cross sell process.

5

Gilbert Leads on Invoices —

61 renewal invoices — far ahead of any other executive, making him a model for the rest of the team.

RECOMMENDATIONS TO THE BUSINESS

1

Fix New Business Process —

Review the full new client journey — find where deals drop off and assign a dedicated closing team.

2

Close the Cross Sell Gap —

Audit the gap between placement and invoicing — delays and approvals are costing us real revenue.

3

Move Pipeline Deals Forward —

Set a 2-week max in 'Qualify' stage and run weekly pipeline reviews to push deals to negotiation.

4

Double Down on Employee Benefits & Fire —

These are the hottest products — increase training, incentives, and marketing focus here.

5

Replicate Renewal Success —

Study what the renewal team does right and apply those same practices to cross sell and new business.

6

Reward High Performers —

Recognize Abhinav Shivam and Gilbert — use their playbook to coach lower-activity executives.

KEY LEARNINGS

1

Data Modeling is Everything —

Connecting fact and dimension tables let us slice data in ways a flat spreadsheet never could.

2

Dashboards Tell Stories —

Power Pivot, Power BI & Tableau turned raw numbers into clear visuals that drive faster decisions.

3

SQL Confirms the Story —

Writing KPI queries in MySQL gave us hard, verifiable numbers — removing guesswork completely.

4

Numbers Point to Action —

Every chart raised a question — and answering those questions is exactly what drives business growth.

Data tells the truth — we just have to listen.
